THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

- a. Authorization for this examiner's amendment was given in a telephone interview Bruce Bower on 08/09/2010.

The application has been amended as follows:

In the claim:

Claim 33 (Current amendment) A system for evaluating traffic dispersion in a communications network, comprising:

at least one exchange being arranged for applying a set of routing rules for selectively allotting incoming traffic directed toward a given destination to a plurality of links;

a measuring module interactively coupled to a computer within the system for measuring the volume of said incoming traffic directed toward said given destination;

an evaluation module interactively coupled to the computer within the system and independent from the at least one exchange and nodes of the communications network, wherein the evaluation module

incrementally generates traffic quantum representative of said traffic, based on receiving, at the evaluation module as an input directly from the at least one exchange, a measured traffic volume of said incoming traffic directed towards a given destination,

analyzes said set of routing rules generated by the at least one exchange, and

produces a distribution of said traffic quantum over said link in said plurality, the distribution thus obtained being statistically representative of the dispersion of said incoming traffic over said plurality of links at said exchange.

Claim 35 (Currently Amended) The system of claim 33, wherein:

the measuring module is configured for determining, for each link in said plurality, a number of call attempts and a corresponding number of seizures, the system further comprising:

a routing rules generating module interactively coupled to the computer within the system for setting a load limit for applying said set of routing rules, said routing rules generating module being configured for:

if said number of call attempts equals said number of seizures, setting a load limit for applying said set of routing rules for said link equal to the number of circuits available in the link, and

if said number of call attempts is greater than said respective number of seizures, setting said load limit equal to the outgoing traffic volume measured by said measuring module on said link.

Claim 36 (Currently Amended) The system of claim 33, comprising a routing rules generating module interactively coupled to the computer within the system configured for:

accepting said traffic quantum to be assigned to a given link only if the sum of all the traffic portions assigned to said link is smaller than said load limit set for said link,

otherwise selecting a next choice in said set of routing rules.

Claim 40 (Currently Amended) The system of claim 39, wherein said at least one ~~valuation~~ evaluation module is configured for:

analysing the traffic volume (TV_{kxy}) directed toward a given destination within said network and carried by a respective link coming out of said first exchange; and

determining a first component of said traffic volume (TV_{kxy}) coming from said second exchange as

$$TV_{kxy, m} = \frac{TV_{mnp} \times TV_{kxy}}{\sum_{\delta \in \Delta} TV_{kx\delta}}$$

wherein Δ is the subset of links used by a current routing rule in said first exchange.

Allowable Subject Matter

2. Claims 23-44 are allowed.

The following is an examiner's statement of reasons for allowance: The claims are allowed for at least the reasons as set forth on page 13-16 of applicant's response filed 04/30/2010, prior art of record does not disclose, in single or in combination of:

Claims 23, 33 recited ...analyzing, at the evaluation module, said set of routing rules generated by the at least one exchange ... in combination with other limitations recited as specified in claims 23, 33.

The closest prior art Kroboth et al. (2004/0037230)Watanabe et al. discloses an A system to collect heterogeneous scalar measurement data over a network from a plurality of devices connected to the network, and normalize the collected

heterogeneous scalar measurement data. The transformed scalar measurement data is displayed in graphical representations such that transformed scalar measurement data from a particular network device can be displayed alongside a graphical representation of a transformed scalar measurement data from a different particular network device. Thus, transformed scalar measurement data from different heterogeneous network devices can be aggregated and displayed in the same graphical representation, but Kroboth failed to disclose analysis a set of routing rules.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
